Ultrasound scans from a CPC in which its staff claimed confirmed a pregnancy test administered at its site. However, the volunteer visiting the site was not pregnant.
Patient Name was seen on Date for a limited ultrasound to determine gestational age and viability. Upon termination of this clinic visit our recommendation is that the patient receive follow-up care as indicated below based on preliminary findings:

☐ Routine OB care.

☐ Inability to detect fetal heart motion.

☐ Gestational age – inconsistency of size versus dates

☐ Rule out ectopic pregnancy

☐ Other: Repeat U.S. in 2-3 weeks. If have any pain, spotting, bleeding call family physician.

Care should be obtained within _______ days.

COMMENTS:

The patient has been directed to seek this medical follow-up as promptly as possible. The patient is aware that she will receive a follow-up phone call at (Phone Number) with the physician’s final report.
